

# Status of Livestock

## Status of Pigs

Common name	Scientific name	Habitat	Status	Population	Adaptation	Management	Disease resistance
Nicobari Pig	<i>Sus domesticus</i>	Nicobar group of islands	Not endangered	35000 (approx Pre - Tsunami)	Adapted to hot and humid climate of Nicobar islands	Backyard production system	Resistant to most of the common pig diseases
Andaman wild pig	<i>Sus scrofa andamanensi</i>	Andaman group of Islands common	Not available	Endangered	Adapted to hot and humid climate of Andaman group	Completely scavenging(Feral)	Resistant to most of the diseases of islands

## Status of Goats

Common name	Scientific name	Habitat	Status	Population	Prolificacy	Adaptation	Management	Disease resistance
Barren goat	<i>Capra hircus</i>	Barren Island (Volcanic Island)	Endangered Post Tsunami status not known	Approx 100	Twins and triplets are common	Adapted to the dreadful and hostile environment	Free range	Acquired resistance to common disease
Terressa goat	<i>Capra hircus</i>	Terressa Katchal and Bambooka Islands	Endangered Post Tsunami status not known	(Pre Tsunami) 2000-3000	Twins and triplets are common	Adapted to hot and humid climate	Free range	Resistant to common diseases

Andaman goat	Caprahircus	Andaman group of islands	Not endangered	---	Twins are common	Adapted to hot and humid climate	Semi-intensive	Resistant to common diseases
Malabari goat	Capra hircus	Andaman group of islands	Not endangered	---	----	Adapted to hot and humid climate	Semi-intensive	Resistant to common diseases

### Status of Cattle on the Islands

Common name	Scientific name	Habitat	Status	Current population	Milk production (lt. per day)	Age at first calving(Years)	Adaptation resistance	Disease	Management
Jangli gai	Bos Indicus	Andaman groups of islands and Campbel Bay	No endangered	About 54,000	1-3	4.5 -5.5	Adapted to humid climate of Andaman and Nicobar Islands	Resistant to common diseases No vaccination done	Backyard
Trinket Cattle	Bos taurus	Nancowry Islands only (Trinket Island)	Endangered and post Tsunami status not known	Survey indicates that the population is about 1000-1400	1-3	Not available	Adapted to tropical climate of Trinket Island	Resistant to common diseases No ca	Free range Feral
Jersey cross or HF cross	Bos indicus	Andaman Islands	Not endangered	6412	4-6	2-3	Adapted to humid climate of Andaman and Nicobar Islands	---	Semi-intensive
